ERGOCUT S 45

PLASMA RANGE

- 1 Torch off.
- 2 By pressing the trigger the torch will be fed by the current thus causing a temporary short circuit between electrode and tip.
- 3 The air then pushes up the small piston, thus creating, between the electrode and the tip, the distance needed to strike the pilot arc.
- 4 By positioning the torch on the part to be cut, the plasma arc will strike.
